

# Stand Up Tall Trust

PO Box 280152

Lakewood, CO 80228

The Stand Up Tall Trust has been created to gather and distribute funds for the daughter of one of our doodle breeders who is battling the rare genetic disease called Metachromatic Leukodystrophy. The disease affects the central and peripheral nervous system and has no known cure. The following web page has good general information about the disease.

<http://www.mldfoundation.org/MLD-101-what.html>

The family will be using the funds to help pay for health costs not covered by insurance including such things as doctor and practitioner visits, prescriptions, therapies, and testing. Also vitamins, dietary supplements, household accommodations, and home care.

For information about contributions, contact Carol at [StandUpTallTrust@gmail.com](mailto:StandUpTallTrust@gmail.com)

Every bit will help in Standing Up Tall against Metachromatic Leukodystrophy!

Thank you!
